

POWER WILL BE OBTAINED FROM OCEANS

Famous Scientist Finds New Source
For Electricity

GEORGES CLAUDE

Gave Lecture and Demonstrations in Moysse Theatre Yesterday

M. Georges Claude, of Paris, Chevalier of the Legion of Honor and member of the Academy of Sciences of France, demonstrated yesterday in the Moysse Theatre how it is possible to utilize the vast oceans as a source of mechanical power. The meeting was held under the joint auspices of the Sigma Xi, the McGill Physical Society, and the McGill Chemical Society.

The progress of science within the last twenty years is certainly amazing. The scientists of the latter half of the nineteenth century were proud in having reduced everything to matter and energy. Nowadays, however, all things are considered as some concentrated form or other of energy. And it is the methods of best releasing and using this latent energy with which the modern physicist is concerned.

The great coal-beds have for many centuries supplied man with power. However, if the present-day rate of consumption of coal and oil continues, the sources available will soon run out.

It is useless to speak of the wind as a source of power, the difficulties and the capital involved are too great.

The greatest drawback in power from waterfalls is that it depends upon the eccentricities of the weather. Too much depends upon seasonal changes, such as ice formation and running dry of rivers. Besides, the total amounts of power to be obtained from waterfalls is far less than what is actually required.

M. Claude believes he has found in the ocean a new source for electricity. Water, under atmospheric pressure, boils at 212 degrees Fahrenheit. However, if the pressure be reduced, the boiling point is lowered. Thus, under one, three-hundredths of an atmosphere the boiling point is about 80 degrees Fahrenheit.

The range in temperature of the water of the tropical seas is from 60 degrees to 80 degrees. The French scientist proposes to have plants along the tropical coasts which would generate electricity from this source flow this might be done he illustrated in a miniature way.

He had a large Winchester bottle containing six gallons of water connected to a huge evacuated jar. Within this jar was a small turbine which was able to generate electricity.

When the stop-cock between the Winchester and the vacuum was opened, the water in the bottle boiled.

New Features At This Year's Arts Banquet

The Arts Undergraduate banquet will be held on Feb. 2, at 7:30. This was the decision arrived at by the various class representatives. This banquet is the function of the year for Arts men. The men in charge have ordered five hundred tickets which will soon be placed in the hands of the different class representatives for distribution. The tickets will be sold at about 2 dollars a head.

There will be several new features at this year's banquet. There will be a table reserved for graduates. Another table will be reserved for invited representatives of other Canadian Universities.

Free cigarettes are to be distributed and an orchestra will be in attendance. Sir Arthur Currie, Dean MacKay and other members of the faculty will be present. The banquet is to be held either at the Mount Royal or the Ritz Carlton, Hotels.

PSYCHOLOGY COURSE TO BE BROADCASTED

Auspices of Massachusetts
University Extension

DR. A. A. ROBACK

Distinguished Psychologist
and McGill Graduate to
Speak From Station WBZ

A radio course in The Psychology of Personal Problems will be broadcast from Station WBZ, Boston by Dr. A. A. Roback, experimental psychologist, who is a graduate of McGill University arranged by the Division of University Extension of the Massachusetts Department of Education.

Dr. Roback is well known as the author of "Behaviorism and Psychology," "Problems of Personality," "The Psychology of Character," "Mental Tests for Superior Adults" and other widely read books on various phases of psychology. The Roback mentality test was used in the notorious Leopold case at Chicago. He has taught at Clark University, Harvard, Massachusetts Institute of Technology and Northeastern University and is frequently consulted as an authority by newspapers in all parts of Eastern United States.

The first lecture on the Psychology of Personal Problems will be given Thursday evening, January 20 at 6:30 p.m. In eight half-hour lectures the following topics will be considered: the psychology of personal problems; human types and how to handle them; the will to be intelligent; your task and how to lessen it; psychoanalysis — boon or bane; the inferiority complex; abnormal quirks of normal people; self-consciousness and its remedy. These lectures will be similar in scope to a series recently completed, given in Boston at the Gardner Auditorium of the State House, under the auspices of Massachusetts University Extension. More

FRANCHISE NOT TO BE GRANTED OUR COLLEGES

Point Of University Representation Is
Debated

ARTS '29 SHOW INTEREST

Debating Contest Brings Out
Fine Talent in Sophomore
Year

That the leading universities of Canada should not elect representatives to the parliament of Canada was the decision arrived at yesterday afternoon by the Arts '29 debaters.

Mr. Goforth, who acted as judge, awarded the decision to the negative, Dobrofsky and Donald, by the narrow margin of 1 point. Although the affirmative, Marks and Lande, had the better arrangement of material, their opponents were much superior in choosing the chief points for rebuttal.

Shortly after 4, L. Marks, leader of the affirmative, rose to introduce the debate, "Resolved that the leading universities of Canada should be granted the franchise of electing representatives to the parliament of Canada." He first explained that the leading universities include McGill, Toronto, Montreal, Dalhousie, British Columbia, and the University of Manitoba; and that to exercise the university franchise, a man must be 21 years of age, a woman 30 years, and each must have taken a degree. This chain of a united educational class is fundamental to the progress of a country, and Canada would thus have representatives who would foster a spirit of greater inter-provincial understanding from the point of view of the educated, which is indeed of vital importance. The speaker then pointed out the advantage to the university-political interest will be aroused and a knowledge of politics is essential to good citizenship. In this way, the university will become the centre not only of educational and social life, but of political life as well.

Lou Dobrofsky spoke next. In his attempt to show that conditions in Canada are entirely different from what they were in England, and that the system is accordingly useless and unnecessary in Canada, he contrasted the England of 1830 with Canada, 1927. Instead of a woefully uneducated, unfranchised, and intimidated mass from which to draw its leaders, Canada can choose from an intact body of

(Continued on page four)

ACTORS HEAR CAST OF MCGILL OPERA

Amazed at Performance of
Cast of Tom Jones

On Wednesday last, members of the cast of the D'Oyley Carte Co., saw the rehearsal of "Tom Jones" and they were thoroughly surprised by the quality of the performance of several members of the cast. The singing they claimed was of a very high order for such a production, and the general proficiency of the organization amazed them. The Tom Jones cast were assured that they would have a performance that would be a credit to them and to McGill.

Dr. Perrin, Col. Bovey, and Mr. Clapperton of the Conservatorium of Music escorted several members of the company on a tour through the buildings. They were particularly impressed with the little theatre, which they compared very favourably with that at Oxford. They also showed a great deal of interest in the Museum.

At the conclusion of the tour, members of the company and Col. Bovey and Dr. Perrin had their pictures taken on the steps of the Arts Building.

KNOX CRESCENT SOCIAL HOUR

McGill Students Invited to Attend
Evening Function

The Young Peoples Club of Knox Crescent Church wish to extend a cordial invitation, to all students of McGill University, both men and women to attend, the Sunday evening social hours held in the lecture hall of the church every Sunday evening at the close of the evening service.

During the coming session Dr. Dickie has arranged to give a series of sermons for young people, and it is hoped by the executive that many will take this opportunity of attending

Best Jazz For Informal He'd By Physical Eds

That the Physical Eds have been fortunate enough to procure the services of Geoff. Simpson's orchestra for the dance which they are holding in the Union next Friday was the announcement issued by the committee in charge of the dance yesterday afternoon.

The dance has every prospect of being as popular as the well-patronized Union informals, which have been endowed with a new span of life during the last term. That the M.S.P.E. committee is doing good work on the dance is the opinion, expressed by those who are in the know.

The purpose of the dance is to raise funds for intercollegiate basketball and intercollegiate hockey among the women students. The M.S.P.E. basketballers intend to invade the Queen City some time next month, and funds must also be raised to pay the expenses of the Queens' women's hockey team which will play McGill shortly in Montreal.

ANNUAL'S SUCCESS ASSURED BY BOARD

"Old McGill 1928" Ready for
Distribution in March

The success of "Old McGill 1928", this year's annual is assured. Subscriptions for it are coming in fast. The material matter of the annual as a whole is much better than any of its predecessors. It is expected that the annual will be ready for distribution among the students the early part of March.

The annual board is being kept continually busy, and they have hit upon some novel ideas to make the book of a highly interesting nature. It is their intention to improve the book and to add more life to the somewhat dull results of some former issues.

Although the annual is being published by the junior year its contents are such as will interest the entire student body.

Subscriptions for the annual have been progressing at a favorable rate. The subscription lists are now in the hands of the class presidents, and are being distributed as widely as possible throughout the University. Any student desiring a copy must place his or her name to this list, and the cost of the annual which is \$3.75 will be deducted from the caution money at the end of the session.

The annual board requests that all subscriptions should be in early.

BRUCE COPLAND WILL SPEAK

To Deliver Address on China at
Erskine Church

BRUCE COPLAND WILL SPEAK . . . B. Bruce Copland, one of McGill's undergraduate authorities on China and subjects relating to that country, is to occupy the pulpit at Erskine Church tomorrow evening, when he will speak on China and missionary work there. Copland is well known around the University where he has spoken considerably on such topics, and it is expected that there will be many interested in hearing him tomorrow.

Bruce Copland was for four years a member of the Honan Mission of the United Church, where he acted as Business Manager of the Mission Hospital at Wei-hwei, Honan. He is now home on leave of absence in order that he may study theology and other subjects preparatory to returning to China.

He will speak about certain phases of his work in China, giving some account of the impressions he received from the Chinese whom he met. He will take as his main topic, the ideas which many Chinese outside the Church now have about the person of Jesus Christ and about the Christian Church and Western civilization. It will be his chief aim to state the reasons why this is a period of unparalleled opportunity for the Church of Christ in China and why it is not a time for pessimism about affairs in China for great optimism.

These social hours are strictly of an informal nature, and after light refreshments there is always a program. Many students of McGill made it a habit last year going down to the church which is at the corner of Crescent and Dorchester St.

The social hour this week will be under the chairmanship of Norman Sharkey, Arts '29, and refreshments will be under the general direction of Jean Macdarmid and Dorothy Dwyer both of R.V.C. '29.

TOM JONES PROMISES TO BE SUCCESS

Will Be First Canadian University
Opera

HIS MAJESTY'S

Members of D'Oyley Carte
Opera Co. Shower Praise
on Cast

A college produced opera in which there are to be 90 people, 65 in the cast, and 25 in the orchestra, is the huge undertaking which the Choral Society of McGill has guaranteed they will produce in little less than four weeks time. That the society has very ambitious schemes is certain, but that these plans should turn out into a very fine and high class production seems equally obvious.

The society this year has risen from a rather inert body of the last few years to a position of great prominence, not only as one of the big undertakings at McGill, but also as one of the outstanding musical associations in the city. It certainly ranks very highly among city organizations, and these latter are doing all in their power to help the production along. Such being the case, there is no doubt that the opera "Tom Jones" will be one of the highly patronized undertakings of the year.

McGill has taken the van in producing the opera. She is the first college in Canada in which an undergraduate society has wholly produced such a thing as "Tom Jones". The magnitude of the cast is not the only thing, for it is stated on good authority that the costuming will be of a very high order, and scenery is specially built and adapted for the purpose. The choruses have all been measured for costumes, and those of the principals are already near completion. In the meantime, the choruses are being trained diligently, and are gradually being whipped into condition.

The rehearsals have all proved very promising. When members of the D'Oyley Carte Opera Co. recently were present at a rehearsal, they expressed their utter astonishment at the very fine display of talent that was in evidence. The cast includes several well-known outsiders, who should, to say the least raise the standard of the show, and attract a great many people to the theatre who might otherwise stay away.

Under the able direction of Mr. Clapperton, of the Conservatorium of Music, the orchestra, which contains many local lights in the orchestral world, is fast becoming an efficient body of musicians.

MORE ENTHUSIASM ASKED OF CO-EDS

R.V.C. and M.S.P.E. to Play
Hockey With Queen's

A combined team of students of the Royal Victoria College and of the McGill School of Physical Education will play a hockey match against Queen's ladies' team in Montreal next month.

In view of the fact that the game is not far off, being scheduled for February the nineteenth, and that the M.S.P.E. attend regular practices it is imperative that the R.V.C. girls attend as many class, and general practices as possible in order to fit themselves for positions on the team. In spite of the record number of students who signed up to play hockey this season, the attendance at recent practices has been deplorably small. Unless greater interest is shown the inter-year matches which are close at hand will be affected—it is essential that each year have as much practice as possible to try-out for these.

However, it is thought that the near future will disclose greater enthusiasm in hockey and that many players will make an effort to turn out to both class and general practices in preparation for the class games and the contest with Queen's.

General practices are coached by Mr. Shaughnessy on Thursday between 2 and 4 and on Saturday between 10 and 12.

Cercle Francais Executive

As several members of the Cercle Francais executive did not turn up for the meeting, which was supposed to have taken place at 3 yesterday it has been indefinitely postponed.

Labor Club Will Discuss Unions On Monday Next

"The Principles, Aims and achievements of the National Catholic Unions" will be the subject of an address to the Labor Club by Mr. J. Tremblay. The speaker is a graduate of Laval University in Arts and Philosophy. He has held the position of General Secretary of the National Catholic Unions for seven years, and has consequently had much experience in labor problems.

He will explain the viewpoint of the National Catholic Unions, its position and its policy, and what he has to say will undoubtedly be very interesting. The meeting will take place in Strathcona Hall on Monday, Jan. 17th, at 8.00 p.m. All interested in the meeting are sincerely urged to attend.

INTER-UNIVERSITY DEBATES MONTHLY

Discussion of Racial and Color
Problems in Canada

Winnipeg, Man., Jan. 14.—(By Exchange Service) All four western universities of Canada will compete on the rostrum of the evening of Friday, January 21st. Arrangements have been completed for the University of Alberta debaters to visit Manitoba, and Manitoba speakers to journey to the University of British Columbia on this date, while the University of British Columbia debaters visit Saskatchewan and Saskatchewan debaters in Alberta.

All four debates will be held on the third Friday of the month, and the subject of each debate will be somewhat similar to the other three.

Racial and color problems which face the Canadian electorate will be the question under discussion by the four Universities. Three motions have been prepared, all calling for the extension of the franchise by a lowering of the color and race barriers.

Committees are now working in all the western Universities choosing teams to compete in the inter-provincial contests. Two debaters will represent each University, and each team will debate once only while it is on tour.

The three subjects chosen by the inter-provincial committee are:

Resolved that all restrictions on voting in Canada based on race and color should be removed.

Resolved that the federal franchise shall be granted to all adult British subjects residing in Canada regardless of race color. The definition of British subject shall be that all who have satisfied the period of resident requirement specified by due legislative authority shall be considered as British subjects.

Resolved that the Canadian National should not be denied the franchise in either Dominion or Provincial elections merely on the ground of race and color. The definition of National shall be as laid down in the Dominion statute books from 1920 to 1924.

Allotments of subjects to the various debates has not been as yet made, nor have the supporters for affirmative and negative sides been named.

A summary of the debates planned for Jan. 21st is:

Manitoba and British Columbia

Alberta at Manitoba.

British Columbia at Saskatchewan.

Saskatchewan at Alberta.

VARSITY GRADS NOW LEADING IN O.H.A.

Varsity is now just about sitting pretty in the O.H.A. The Seniors lead their group with 3 wins and no losses, having scored 23 goals to 1 for their opponents. The Intermediates are out in front in their section with 2 wins and no losses and have a fine opportunity to increase that advantage by another game when the team meets Burlington at the U. of T. Arena next Thursday night. The Juniors, after getting off to a bad start, losing two games, have won their last two and are now in second place, with a fine opportunity to step higher when they meet the group leading Marlboros in the first half of a double-header at the new Varsity rink on Tuesday night.

FINAL REPORT OF CONFERENCE JUST RECEIVED

Success Of Federation Depends Upon
Support From Student

BRIEF HISTORY

While no Representatives Enthusiastic Neither Were any
Opposed to Idea

Following is the first instalment of the report of the organization meeting of the National Federation of Canadian University Students held at McGill last December. Other instalments of the report will follow at a later date.

FOREWORD

In preparing this report of the Conference of representatives from the Canadian Universities at which the formation of a National Federation of Canadian University Students was investigated, those responsible desire this opportunity of calling to the attention of the Governing Student Bodies in each of the Canadian Universities, one or two matters of important consideration.

While the Conference delegates have expressed themselves in favor of the formation of the National Federation of Canadian University Students, and have appointed pro tem officers, the Federation will not become a fact until at least ten Universities have notified the pro tem Secretary-Treasurer of their having become members. This places the responsibility for the actual formation of the Federation, in the hands of the Governing Student bodies of the Universities of Canada.

In the event of ten or more of the University Student Bodies becoming members of the N. F. C. U. S., it will be well to remember that the success or failure of the Federation to achieve year by year its purpose will depend upon the constructive support which it receives from each of the Student Bodies, and upon the calibre of Canadian students who are chosen to guide its destiny. The Federation can never be a thing above or apart from the students. It is the students in each Canadian University co-operating for their mutual welfare and in the best interest.

PRIME MINISTER TO DEBATE IN TORONTO

Resolution Deals With Agree-
ments on Imperial Relations

Toronto, Jan. 14.—(By Exchange Service)—The Rt. Hon. W. L. M. King, Prime Minister of Canada, will take part in a Hart House Debate on the evening of Saturday, February 5th. "The Varsity was informed yesterday evening by the Chairman of the Debates Committee of the House. The distinguished graduate will speak fifth to the motion, "Resolved that this House approves of the agreements on Imperial relations made at the recent Imperial Conference."

Arrangements for the Debate are not yet complete in detail, but the presence and participation of the Prime Minister are certain, according to "The Varsity" information.

Mr. King's consenting thus to honour the Hart House Parliament is regarded as a hopeful sign of increasing interest on the part of public men in the Dominion. The fact that the resolution has reference to the Imperial Conference, which is at present a matter of some political controversy, will add to the unusual interest of the occasion.

Notre Dame Unbeaten At Home For 21 Years

Not since 1905 has an alien boot trod victoriously over the greenward of Cartier Field, ballfield of Notre Dame's football aggregation. Twenty-one years ago Varsity College of Crawfordville, Ind., won from the Irish, 5 to 0 on Cartier Field. Since then Notre Dame has won more than 100 games on its own field without suffering defeat. Several times in recent years Notre Dame has trailed its opponents into the final periods of home games. In 1921 a flashy Irish game Notre Dame victory over Nebraska before a home crowd, and in 1925, the second half of the home coming game opened with Northwestern leading the Irish 10 to 0. A touchdown in each of the last two periods saved the Cartier record.

Special Daily News Hunter Sets Interesting Interview With Distinguished Foreigner

'Twas a terrible night. The queen of darkness was in power. The trees moaned as the wind passed through their boughs. Way off in the distance was heard the howl of a dog. From somewhere out of the black came the purr of a passing motor.

'Twas near midnight. A shadow passed up the campus and made its way for the Museum. It was Spookem, the star reporter of the Daily. He had been assigned to interview the lady Egyptian who lived in the Museum. Spookem was young and fearless; there was no doubt he would get a story which would scoop the "Queens Journal" and "The Varsity".

Arriving at the door of the Museum he unlocked it by means of his skeleton key and entered. Within, it was dark and quiet. He lit his electric torch and proceeded on his way upstairs.

Once arrived, his hair stood on end. There, in front of him, was a long glass showcase. And within, with her face painted in gold and her body wrapped up in colored bandages, lay a lady. Near her was a card bearing the following inscription.

"Lady mummy. From the Lower Nile. Presented by Dr. Zizog."

Just then the clock downstairs sent

out twelve sonorous booms Midnight.

With the last toll, the body within the showcase began to move. Spookem's heart went down into his boots and came up again. Undoing the catch of the cover with her hand, the body rose slowly from out of the case and stood in front of the reporter. She was short and slim, and her gilded face was beautiful to behold.

"Ah, you wanted to see me?" she inquired of Spookem in a sweet silvery voice.

"Er—er—yes. The editor sent me to interview you."

"Editor?" Why, what is that?" she asked, puzzled.

"The Editor is the chief cheese of the Daily."

"Daily? What does Daily mean?"

"A newspaper. You see, the students publish it."

"Newspaper? Students? Why what are those?"

Spookem was about to explain when just then the clock downstairs struck the half-hour. Immediately the young lady stepped into the showcase and sank back. She was a mummy once more.

Spookem stole silently out of the building. And to still his nerves, he wended his way to the "Pig and Whistle."

New Fangled Towels

Saturday, January 15, 1927.

Those Colleges

Thus ends the allegory of the college student.

Away we go scampering to the side of the road, for here comes a Ford.

***Next Week At
The Theatres***

AT THE PRINCESS

The story of "Miss-Mates" is a tale of incongruity in marriage Judy was a son of wealthy parents. She was a pretty manicure. His parents disapproved of him. He has never had to work for a living, and he finds it very hard. Things begin to look black, and Judy against her young husband's wish goes back to her manicure table and its suspiciously lucrative profits. The husband discovers that his wife's old associates are using her as a screen for a series of burglaries. In anger, he leaves her, taking their only child with him. Later he tells her that the child is dead. In despair, she

AT THE GAYETY

AT LOEW'S

AT THE IMPERIAL

"The Whirl of Syncopation" which heads the bill at the Imperial next week, promises a variety of entertainment. In the company are, Exile Butler and Sister, harmony singers and saxophone players; Don Santo, the "World's Flash Black Bottom Dancer"; Joe Kelly, tap dancer; and Price and Francis, character dancers. Eddie Clifford, comedienne, will render special songs, accompanied at the piano by Marlon Carr, Mel Klee, a black face comedian, will give a monologue. Frank Readick and Company will present a little comedy called "Blondes Feed Drives" and Edith Barrington

AT PALACE THEATRE

AT THE CAPITOL

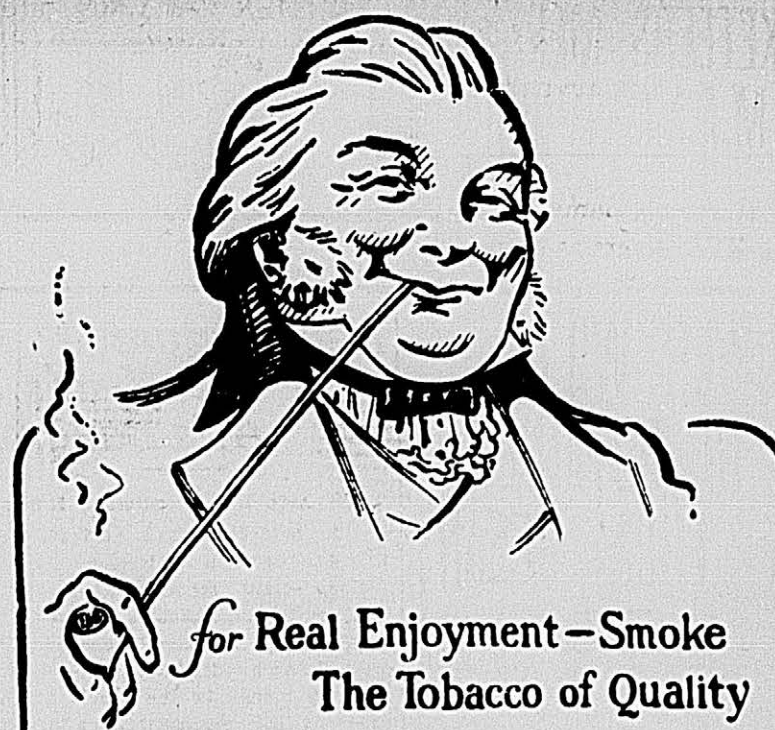

The special bill on the programme in honor of Beethoven's memory will feature the 'Beethoven Trio' in B. Flat, presenting Arthur Michael, Tenor, who will be brought up to Montreal from New York to sing a Beethoven number. Mr. Michael was for many years at a school of music in Germany and is very familiar with the interpretation of Beethoven's masterpieces. Others in the cast include George Beudet, Violinist, who will render "Miserere"; Severin Molise, Pianist, who will play "The Swan by St. Saens" according to his own arrangement for the Piano Solo, ad Peter Vander Meer, Cellist, who will "Elegie" for Massenet.

Petit Parisien

"Die Liebtztherbungzerschafft."

AND CO., LONDON

BASKETEERS MEET M.A.A.A. TONIGHT

Play Return Game With
Winged Wheelers at Home

KOFF MAY PLAY

Seconds Open Season Against
Central Y.M.C.A. — Shoot-
ing Improved

Both of the red and white basketball quintettes get into action again tonight, the seniors playing their last exhibition game before the opening of the intercollegiate series next Saturday while the intermediates start their season in the city league. The seconds meet Central Y. M. C. A. in the opener at 8 o'clock while the first string squad plays M. A. A. A. in the second game of a home and home series. The two contests are McGill home games and will be played in the Montreal High School gymnasium, the curtain raiser beginning at 8 o'clock and the senior fixture an hour later.

The McGill seniors still smarting from their loss of last week are out to win tonight and hope to take the contest by more than three points so that there will be no doubt as to their superiority over the Winged Wheelers. The intermediates too are anxious to chalk up a victory and thereby start their season in the city loop in the approved fashion.

McGill's basketball stock soared still farther last night when it was learned that Koff, a sharp-shooting forward and high point scorer on last year's senior intercollegiate team had been out at practice during the week and had expressed intentions of returning to the game. Koff's studies have kept him off the floor so far this year.

Coach Van Wagner will start Errol Amaron and Stan Quackenbush on the defence tonight against the Eastern Champions while Hicks and probably Johnston will be on hand to relieve the two veterans. Johnston was at the work-out again yesterday after an absence of nearly a week due to illness. Albert Grossman or Fred Weldon will get the call at centre with the conditions favoring the former as Weldon is suffering from a sprained finger. Besides the coach is anxious to try out as many combinations as possible and Grossman has shown signs of being able to play as well at the pivot position as on the forward line.

Benny Sacks and Bob Rayden will be the two forwards to start. Both lads were going well at practice yesterday afternoon and great things are expected from this pair this evening. George Faulkner and Lyle Lashley are the two remaining members of the senior quintette who will begin the evening warming the substitute bench. Both men are almost certain to get into the game however. A feature of the exhibition tilt will be the appearance of Lyle Lashley who will make his debut before a red and white basketball audience. This much-talked-of player comes to McGill with a splendid reputation. He will have a chance to live up to the advance notices and prove his worth tonight.

Basket shooting and principally free throws, was the order of the day at yesterday's practice. Inability to net free shots lost the game for McGill last week so the seniors are determined that such a thing will not happen again. All in all considerable improvement was noted.

There is little to say about the intermediates. Although they have been practising faithfully for well over a month they have only played one exhibition game to date. This was against the C. N. R. team before Christmas and resulted in a decisive win for the red and white.

Captain Statner and Munroe will start on the forward line tonight with Silverman at centre and Feldman and Calhoun on the defence. Covshoff will be the substitute defence man while a trio composed of Fraser and Blumenthal forwards and Wykes centre will also be held in reserve. The Statner-Silverman-Munroe combination and the Fraser-Wykes-Blumenthal group have both been working well and both should be in evidence tonight.

Pat Manley, intercollegiate referee will look after the senior affair while D. MacRae director of athletics at the Montreal High School will handle the opening game.

Jewtdaw Coaches Dadtmo

Charles Jewtdaw of Lake Placid, N. Y. Internationally known as a speed skater, arrived in Hanover yesterday morning as the guest of the Outing Club, and is staying at the Davis Field House, which will be his headquarters through Friday of this week, when he will leave for Waterbury, Conn. to give an exhibition in the carnival to be held there. While here Jewtdaw will assist in round-the-squad of Green speed skaters in to shape for their coming meets and at the same time will train for his 1927 season.

FORMER CAPTAIN

Stan Quackenbush, leader of the 1926 team, who pairs with Amaron on the defence tonight.

NOTED SPORTSMAN DIES AT QUEBEC

Henri Fontaine, Succumbed
Yesterday

Quebec, January 14.—The sporting world lost one of its most prominent figures early this afternoon when Mr. Henri Fontaine, owner of the Quebec Arena, and president of the Quebec Hockey Club, died suddenly at his home on St. Cyrille street, after being ill for just a few hours.

Mr. Fontaine for the past quarter of a century has been the leading figure in the local world of sport, having organized and financed dozens of hockey and baseball teams, as well as being a promoter of practically every sporting event which took place in the city of Quebec for a number of years.

He was vice-president of the Quebec Amateur Hockey Association for three years, but this season resigned from the amateur organization to take over the Quebec hockey club of the professional league.

Mr. Fontaine is survived by his wife and four children, three sons and one daughter. Funeral arrangements will be made later.

McGILL TO ENTER COLLEGE SKI MEET

Canadian and U.S. Universities
Compete at Quebec

Quebec, January 14.—One of the feature events of this city's winter sports season, now in full swing and approaching its height, will be shown here over the week-end with the international intercollegiate cross-country ski run and jumping contests that are to be held here tomorrow and Sunday. United States and Canadian universities and colleges are scheduled to take part and these will include Harvard, Dartmouth, Colby, Ottawa, McGill, Laval, Montreal and Loyola.

Entries so far received are: Dartmouth, Charles Proctor and T. T. Brittan; University of Montreal, Jacques Fortier and Omer Manseau; Loyola College, W. Bisson and C. Beaubien; Laval University, Jacques Tache and L. P. Gingras; Ottawa University, J. Neville and L. Audette.

The cross-country run is over a difficult stretch comprising hill and the flat, starting at Sillery Junction, ends at the Champlain Monument on Dufferin Terrace. The jump is over a specially prepared hill, where it is hoped to obtain distances well over a hundred feet. Latest reports are that the weather, while not cold will be sufficiently so to provide good flat surfaces. There is an ample depth of snow.

VARSITY BEAT QUEEN'S 5 to 4 AT KINGSTON

Kingston, Jan. 14.—(Special to McGill Daily)—Queen's senior hockey team suffered their second straight defeat of the season here at the Jock Hardy Arena last night when they were defeated 5 to 4 by Varsity's representatives in the intercollegiate series. The defeat means practically elimination of the tri-color from the 1927 series.

The game was both fast and clean although eight penalties were handed out to the two squads by Referee Harry Batstone. The winners were superior in team play and showed more condition than the Kingstonians besides being more effective around the goal mouth.

The teams lined up as follows: Varsity—Stollery, goal; Fitzpatrick and Whitehead, defense; Dunne, Richards and Harley, forwards; Greasy, King and Hargrave, subs.

Queen's—Quinn, goal; Bellamy and Rooney, defense; Lindsay, Logan and Reid, forwards; Britton, Wright and Whitton, subs.

Down To Brass Tacks

With D. A. L. MacDonald.

The following article has been contributed by an associate editor of the staff and which we think is very much worth while printing here.

"It is with mild surprise that we note, in a report from yesterday's daily, the evident intention of the women students of McGill to enter the field of intercollegiate competition. The announcement states that the proceeds from the dance which is to be held next Friday, in the Union, will be devoted to the promotion of a trip to Toronto by the physical ed. basketball team, and also to help defray the expenses of a hockey game against Queen's undergraduates on home ice.

"The advent of women into intercollegiate sport can be looked upon in two ways. As a manifestation of equal rights between men and women undergraduates, we can of course, have nothing to say against it. However, as an expansion of the present system of intercollegiate activity, there are arguments both for and against.

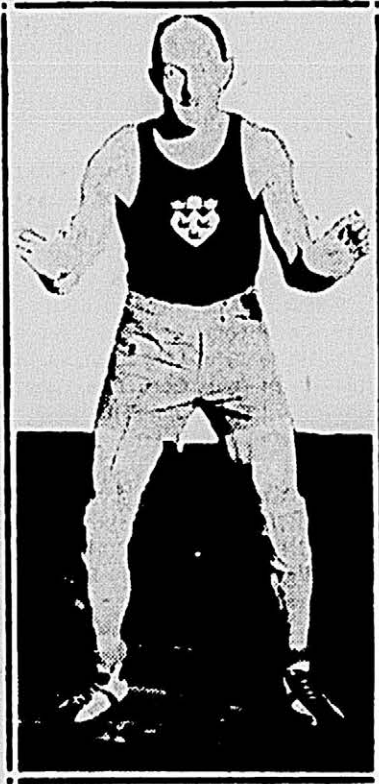

"Before expanding intercollegiate competition as we have it now, into wider fields, it is necessary that the matter should be thoroughly discussed, in order that the desirability of such expansion should be made evident.

"At the present time of course, we can do very little. As long as rugby continues as a major sport, intercollegiate games are necessary, because nowhere except in the university field can we find teams of a sufficiently high calibre to meet our own teams. Since the very existence of rugby is therefore dependent on an intercollegiate schedule, such competition must exist for rugby. But what exists for rugby must surely be granted for other sports, which have a right to equality with rugby, so there you are. We have intercollegiate track, golf, soccer, tennis, hockey, swimming, water polo, and now we have rowing and each one of these sports has a right to be a major as long as intercollegiate competition of any description is indulged in.

"We're back where we started. If we continue humming and hawing, the women will claim that we are not in favor of equal rights for them in athletics as well as in the other lines which they have invaded with so much success. Maybe it is so. Anyway we can admire them on their twentieth century determination, initiative, and business-like procedure. Our congratulations are forthcoming on account of the efforts they are making to introduce a new sport at McGill. If they could make girl's hockey interesting for spectators, they would not need to resort to such tricks as a dance in order to raise funds.

"But perhaps the boys would rather pay up in this way! Feminine intuition !

BASKETBALL CAPTAIN

Errol Amaron, veteran defence man of the red and white quintette, who plays against M.A.A.A. tonight.

INTERMEDIATE HOCKEY COMMENCES TONIGHT

Loyola Plays U. of M. — Four
Teams in League This Year

The opening game of the intermediate intercollegiate hockey season starts Saturday night at 8:30 o'clock at the Loyola Stadium, when the Loyola College sextette will be pitted against the University of Montreal. The Loyola team that takes the ice this season will be almost the same aggregation that won the Provincial Intermediate Intercollegiate title last year, with the exception of Noble and Mill. The team has been in training for some time, and Coach Paul Noble—brother of Reg. Noble, of the Montreal Maroons—hopes to turn out a championship team again this year.

The season will again see Smith taking care of the nets and he will be supported on the defence by Bannan and Savard. The forward line will see one newcomer in the person of McAlair, who will appear at the right wing position. Pregeau, the veteran centre, will appear in his old place, and Dolan will take charge of the left wing. The schedule for intermediate intercollegiate hockey this season will be as follows:

January 16—U. of M. vs. Loyola;
McGill vs. Bishops.
January 22—McGill vs. Loyola; U. of M. vs. Bishops.
January 27—Bishops vs. U. of M.
January 29—U. of M. vs. McGill.
February 5—McGill vs. U. of M.; Loyola vs. Bishops.
February 12—Bishops vs. Loyola.
February 19—Bishops vs. McGill.
February 26—Loyola vs. McGill.
Date undecided—Loyola vs. U. of M.

Jimmy: Oh, Mamma, I have a football!
Mamma: Well, put some corn plaster on it tonight.—EX.

"Was your town ever visited by a conflagration?"
"Naw; the worst that ever happened us was in 1916 when the town burned down."—EX.

"Ah, but he said I was one in five."—EX.

SENIOR GAME AT QUEBEC CANCELLED

Intermediates go to Lennoxville to Open Season

There will be no game between McGill and Sons of Ireland tonight in Quebec as a result of a telegram received of one of the officials of the Capital City team has necessitated the postponement of the game which was scheduled as a regular Q.A.H.A. fixture. No future date for the playing of the contest has been fixed but will be arranged later in the season.

This afternoon, the intermediates journey to Lennoxville to open the intercollegiate season with Bishops' at the latter's rink. Seventy-five puck-chasers reported to Coach Shaughnessy yesterday at the Forum where the first intermediate practice of the year was held. The juniors were also on hand, and many of them showed up very well in the faster company.

Shooting practice was first indulged in and then a practice game was held for the remainder of the hour.

At the end of the game, Captain

FINAL REPORT OF CONFERENCE RECEIVED

(Continued from page one)
terests of their common heritage—Canada.

CONFERENCE DELEGATES

Note—Each university represented at the Conference was entitled to one vote and could have one official delegate together with two other representatives.

Official Delegates

University of British Columbia—Mr. J. Oliver.

University of Alberta—Mr. E. B. Wilson.

University of Saskatchewan—Mr. G. F. Curtis.

University of Western Ontario—Mr. W. E. Bagnall.

University of Toronto—Mr. J. McCulley.

Ontario Agricultural College—Mr. D. A. Andrew.

McMaster University—Mr. H. Todd.

Queens University—Mr. D. A. Skelton.

University of Montreal—Mr. Leo Lesperance.

McGill University—Mr. R. G. M. Gammell.

Bishops College, Lennoxville—Mr. L. I. Greene.

Acadia University—Mr. H. M. Molins.

Other Representatives

University of Toronto—Miss L. Scott—Mr. M. K. Kenny.

Ontario Agricultural College (MacDonald Hall)—Miss M. Maunders—Miss N. Rogers.

McMaster University—Miss Hodges.

McGill University—Miss M. MacSparran—Mr. E. C. Amaron.

Prof. N. A. MacKenzie was present as a guest of the Conference, and as an official representative from the Confederation Internationale Des Etudiants.

G. F. Bannerman, Secretary-Treasurer, Students' Administration Council, University of Toronto, was present as an unofficial guest of the Conference.

A BRIEF HISTORY OF THE INCEPTION OF THE 1926 CONFERENCE

During the Canadian tour, in the Spring of 1926, of the Imperial Debating Team, Mr. Ralph Nunn May, one of the members of the team met with members of the Student Councils in the various Canadian Universities. As immediate past President of the National Union of Students in England and Wales, he broached the possibility of a similar organization being developed in Canada.

The information given by Mr. May and interest displayed in the Canadian tour of the Imperial Debating Team, raised the question in the minds of the members of a number of the governing student bodies in the Canadian Universities as to the possibility and need of a somewhat similar organization in Canada. Early in February, a letter was received by the Secretary-Treasurer of the Students' Administration Council in the University of Toronto, from the Secretary of the Student body in the University of British Columbia, asking the opinion of the Student Council in Toronto, with regard to forming a National Union of Students in Canada. On February 15th, the University of Manitoba Students' Union sent out letters to the various student bodies in Canada, asking for their views on the formation of a National Union of Students and stating their favourable attitude towards its formation. On March the first, Mr. Percy Davies, President of the Students' Union in the University of Alberta, wrote to the Students' Council at Toronto, and suggested the holding of a Conference of representatives to thoroughly discuss the possibilities of a National Union of Students. By March 23rd, the joint Executive of the Students Councils at Toronto had discussed the value of the proposed organization and had gone on record as being ready to co-operate with any of the other Universities in the sending of a delegate to a Conference to discuss the advantages and disadvantages of such an organization. Letters were sent by the Secretary-Treasurer to all the other Canadian Universities stating the position taken by the Council at Toronto.

Throughout the summer vacation of 1926, Davies in Alberta and Bannerman, Secretary-Treasurer at Toronto, were in communication with each other, while letters were received by them from Manitoba, Saskatchewan, McGill and Dalhousie Universities. At first it was suggested that the Conference be held in September, prior to the beginning of the College year. As this time approached, however, it was felt by Davies and agreed by others, that a longer time should be given to enable each Student Council to thoroughly discuss the idea of some form of association between the various Canadian Universities. Accordingly, the holding of a Conference was left over until the Christmas vacation.

In October a letter was received from Davies by the Students' Council in Toronto, suggesting that the time had arrived for the sending out of an invitation to all the Canadian Universities, to send an official representative to a Conference to investigate and to prepare a report and recommendations for the consideration of each University upon the forming of a National organization. He suggested that the Students' Council at Toronto should send out the invitations to this Conference. In the meantime, the Secretary-Treasurer at Toronto, had been

FRANCHISE NOT TO BE GRANTED OUR COLLEGES

(Continued from page one)
educated, representative men. The quality of this body is evidenced by the fact that of 245 members in the last Canadian parliament, 167 have gained university degrees—almost 70%. He concluded by showing that the proposers of this resolution were advocating a system which reverts to the old trouble of Unequal Representation and of class distinction.

Landt then took up the cudgels for the affirmative. He claimed that scholarly men who are intimidated by the hustings go to the universities for election, that university franchise makes elections less corrupt, eliminating telegraph voting and bribery, that money would be saved at elections; that a man must be well-known to sit for a university; that Canadian politicians are all of one class—lawyers and farmers are over-represented, while the educated class and the professoriate are under-represented; that no professor has sat in the Canadian Parliament. He discussed, too, the value of plural voting.

The last speaker for the negative was H. Donald, who was easily the best in pole and delivery. His speech was a witty one, in somewhat the "English" style. He indicated what a vast and pronounced difference there exists between the Canadian and English student. The latter has some sort of political knowledge, while here there is practically none. One reason for this was the difference in cost of education, and the greater time at the disposal of those students. As for the belief that education would suffer if there were no franchise, this does not apply to the existing conditions here.

After the rebuttal by Marks, Mr. Gifford, in awarding his decision, commented on the high standard of the speeches, as compared with the inter-collegiate level when he was a student.

to McGill University and had discovered that while neither opposed or in favor of the formation of any organization, they were prepared to have a delegate at the Conference, and when it was suggested that the Conference be held at McGill in Montreal, they stated that if it was the wish of the other Universities to hold the Conference there, they would be prepared to provide hospitality and entertainment without cost, to the delegates.

On returning to Toronto, the General Secretary-Treasurer of the Students' Council, reported upon his visit to Montreal. The Council considered the letter from Davies, and finally authorized the General Secretary-Treasurer to send out invitations together with a suggested agenda for the holding of the Conference in Montreal during the Christmas vacation. While these invitations had been sent out too late for some of the Universities to make arrangements to attend the Conference, the majority replied to the effect that they were sending a delegate to the Conference.

The attitude of each University appeared to be that of willingness to have a careful investigation made into the possibility of a real value being derived from the formation of a National Student Organization. No one University Student Council appeared to be overly enthusiastic about the formation of such an organization, none appeared to be opposed. All appeared to be willing to consider in the best possible light the results of the Conference. With this attitude, and in this spirit of investigation, the Conference had its inception.

AGENDA

Conference of Representatives Student bodies of Canadian Universities, Montreal, December 28, 29, 30 31st, Tuesday, December 28th.

11 a. m.—12 noon—Registration of representatives. Presentations of credentials. Election of Conference Chairman and Secretary.

2 p. m.—3:30 p. m.—Opening address by Mr. N. A. MacKenzie, Assistant Legal Advisor to the International Labor Bureau, League of Nations, now professor of International Law.

Subject: The History of the National Union Students' Movement; its operation in England, South Africa, Australia and on the Continent; the purpose it serves in these countries.

Note: Professor MacKenzie, a graduate of Dalhousie University, Harvard Law School and Cambridge, is well fitted to present the History of these movements as he has been present at the National Union of Students Conference in England, as well as the conferences of the confederation Internationale des étudiants.

Discussion and questions will follow this address by MacKenzie.

4 p. m.—5 p. m.—Discussion of the advantages to Canadian students of forming a Federation of Canadian Students.

(1)—Promotion of understanding and exchange of ideas between eastern, western and central University sections of Canada.

(2)—Interprovincial scholarships—exchange of students—possibility of government assistance for such scholarships.

(3)—Arrangement of debates and athletic events between Universities—present system if any—how Federation could improve on or assist present methods of exchanging teams in debating and athletics.

(4)—Value of Federation in securing special privileges in reduced railway fares for students travelling between Universities.

(5)—Value of Federation as a clearing house of ideas between the various universities on matters of student government, student publications and student activities generally.

Note: These suggested subjects for discussion would also bring out the difficulties which student representatives might see in the formation of a Federation of Canadian students.

(To be continued.)

PSYCHOLOGY COURSE TO BE BROADCASTED

(Continued from page one)
than five hundred men and women were enrolled in this course.

Dr. Roback is an alumnus of McGill University and as an undergraduate was the winner of many awards for scholastic distinction, among them the Prince of Wales Gold Medal. For a number of years he has been prominent in Jewish intellectual circles having been a contributor to nearly every leading Jewish periodical in the United States and Canada.

Any person in the United States or Canada who desires may become an enrolled member of this course, receiving printed syllabi and lesson material, by sending in name and address together with the nominal fee of \$1.00, to University Extension, State House, Boston, Mass. In past courses broadcast, men and women from nearly every state and from all the provinces in eastern Canada were enrolled.

by 200 atmosphere, that is, 200 times the pressure of the atmosphere. M. Claude's process is used by Latex Incorporated, which is controlled by the Du Pont de Nemours Company, the most powerful chemical company in the United States.

Tonight, at 8:15, M. Claude will speak in French before the Alliance Française in the Moyse Theatre on "My Scientific Researches." All those interested are cordially invited to attend.

Known the world over, not only as a physicist but as a pioneer in new applications of physics in the engineering world, M. Claude developed the procedure for the liquefaction of gases in general and has made possible a number of new applications in various processes, which have created almost a new era in industry. His book, "Liquid Air, Oxygen and Nitrogen," is known to scientists the world over, as are his numerous other books and pamphlets.

M. Claude is the pioneer who laid the foundation of dissolving acetylene. The quantity of dissolved acetylene now sold in the United States and Canada is nearly 500,000,000 cubic ft. per yard and is of an annual value of \$12,000,000. His process of liquefaction of air into oxygen and nitrogen is used in the United States by the Air Reduction Company which has 45 plants, and is also used in France, Canada and England—in fact, all over the world.

M. Claude's process for liquefaction of gases and separation into separate elements has enabled him to obtain not only oxygen and nitrogen, but also rare gases such as neon and helium. With neon, he has developed the neon lighting, which is used extensively in various leading cities of the United States, including New York, Chicago, Detroit and Los Angeles, and also in France, Spain, Germany and many other countries. An example in Montreal is the illuminated sign of the Mount Royal Hotel.

Another new world famous process originated by M. Claude is his process for the synthesis of ammonia. He instituted a great improvement in the synthesis of ammonia, using a hyper-pressure known to physicists as 1,000 atmospheres—that is, 1,000 times the pressure of the atmosphere—a much greater pressure than has ever been used before for this process.

The pressure in the well-known Haber Process used in Germany is only

way fares for students travelling between Universities.

(5)—Value of Federation as a clearing house of ideas between the various universities on matters of student government, student publications and student activities generally.

Note: These suggested subjects for discussion would also bring out the difficulties which student representatives might see in the formation of a Federation of Canadian students.
